Shipping Policy

Shipping commitments for Northwind Commerce (fictional).

Standard delivery window

Standard orders are expected to arrive within 5 days of the order date unless a different expected delivery date is shown on the order record.

Status meanings

PLACED means the order is accepted. PROCESSING means warehouse work is underway. SHIPPED means the carrier has the parcel. OUT_FOR_DELIVERY means last-mile is in progress. DELAYED means the expected date has passed without delivery. DELIVERED means the customer received the parcel. CANCELLED means the order will not ship.

Investigating delays

Support executives should inspect expected delivery, actual delivery, and current status before promising compensation. Do not invent a carrier location if it is not in the order record.

Missing address data

If shipping address information is missing from the order, the case should be flagged as missing information and may require escalation.
